

Pathfinder: Wrath of the Righteous

Inevitable Excess (IE) Complete Endgame Builds and Ratings

Prepared for characters and parties in **Inevitable Excess (IE)**.

This file ranks complete IE end states. It does not rank DLC archetypes in isolation. Every scored row is a finished build for one of the two IE modes: a level-20 class build with a Mythic Rank 10 route, or a fresh Mythic Rank 3 Legend build extended to 40 class levels.

IE-only scope

This guide excludes the main-campaign sequence where a character takes Trickster, Angel or Lich and later changes to Legend at Mythic Rank 8.

The two scored IE modes are:

1. **IE Mythic entry: level 20 / MR10.** The build has 20 class levels and a selected mythic route; this is the guide's "30-step" end state.
2. **IE Legend entry: MR3 -> 40 class levels.** Legend is selected immediately at MR3. The build then uses ordinary class levels to reach 40; later MR4-10 path features are unavailable.

A fresh IE Legend cannot use Angel, Lich or Trickster path features. Those systems are therefore scored only in the IE MR10 column. Swarm-that-Walks and Gold Dragon are tracked separately as IE MR8 candidates and are not given a score until their complete routes are written.

Unified IE endgame score

The score is an internal comparison of complete IE end states, not an official game rating and not a DLC-archetype rating.

Score	Tier	Meaning
9.5-10.0	SS	Exceptional endgame ceiling, low practical compromise
9.0-9.4	S+	Clearly dominant in its role
8.5-8.9	S	Excellent endgame system with a defined trade-off
8.0-8.4	A+	Strong and reliable, but below the top systems
7.5-7.9	A	Usable, but not a first recommendation for an optimized IE party

IE path facts used in this document

A fresh IE character can select **Legend at Mythic Rank 3**. This differs from the main campaign, where Legend is normally a late Mythic Rank 8 transition. A fresh IE Legend therefore does not receive normal Mythic Rank 4-10 path progression or a merged Angel/Lich spellbook.

Sources:

- [Steam discussion - IE Legend is available at Mythic Rank 3 and cannot be taken later after another path](#)
- [GameFAQs - Legend mechanics and loss of later Mythic ranks/spellbook](#)

IE final-build scope

This guide evaluates **Inevitable Excess only**. It does not use the main-campaign route "take Trickster/Angel/Lich first, then change to Legend at Mythic Rank 8." In IE, the two build modes are separate:

1. **IE Mythic entry: level 20 / MR10:** continue with a mythic path at the IE mythic entry. The finished build is 20 class levels plus the selected mythic route (the guide's "30-step" format).
2. **IE Legend MR3 -> character level 40:** select Legend at MR3 immediately. The finished build is a 40-level class split; later MR4-10 path features are unavailable.

IE MR8 Swarm-that-Walks and Gold Dragon are listed as future IE candidates below. They are tracked only for an IE save that actually exposes MR8 progression; they are not fresh IE MR10/Legend entry builds, and their full builds are not claimed until separately written.

Complete IE endgame rating list

The scores below compare complete IE end states under Unfair assumptions with final gear and a fully buffed party. Inciter, BFT and Oracle scores measure party value; KSS and Sword Saint scores measure personal endgame output.

Score	Tier	Final system	IE final form	Legend status	Why it ranks here
9.9	SS	Angel Oracle	Seeker Oracle 16 / Scaled Fist Monk 1 / Paladin 2 / Hellknight 1 / Angel MR10	MR10 only	Merged Angel spellbook, top buffs, healing and bolt damage
9.8	SS	Lich caster	Stigmatized Witch 10 / Loremaster 9 / Crossblooded Sorcerer 1 / Lich MR10	MR10 only	Merged Lich spellbook, Corrupt Magic and powerful negative-damage casting
9.7	SS	Kinetic Sharpshooter	Kinetic Sharpshooter 20 / Trickster MR10	MR10	Independent ranged finisher with Quiver, critical tricks and minimal party dependency
9.7	SS	Trickster Sword Saint	Sword Saint 20 / Trickster MR10	MR10 only	Dimension Strike, Trickster critical feats and Trick Fate
9.6	SS	Inciter Skald	Inciter Skald 20 / Trickster MR10	MR10	Strongest party-wide melee multiplier, rage powers and control
9.6	SS	Kinetic Sharpshooter Legend	Kinetic Sharpshooter 20 / Mutation Warrior 20	Fresh IE Legend MR3 -> 40	Best path-independent Legend ranged finisher; extra levels add martial accuracy and feats
9.4	S+	Brown-Fur Transmuter	Brown-Fur Transmuter 20 / Azata MR10	MR10 only	Shared transformations and party-wide stat, weapon and speed buffs
9.4	S+	Inciter Legend	Inciter Skald 20 / Mutation Warrior 20	Fresh IE Legend MR3 -> 40	Keeps the Skald party engine and uses 20 Fighter levels for martial feats and mutagen
9.3	S+	Mutation Warrior / Demonslayer	Mutation Warrior 19 / Demonslayer Ranger 1 / Trickster MR10	MR10	Full martial chassis, mutagen, weapon training and Trickster crit support
9.2	S+	Dual-Cursed Oracle	Dual-Cursed Oracle 20 / Angel MR10	MR10 only	Strong curse/control Oracle with Angel divine casting
9.1	S+	Geomancer	Stigmatized Witch 10 / Geomancer Sorcerer 1 / Loremaster 9 / Azata MR10	MR10	Fire rays, area damage and selective control
9.0	S+	Mutation Warrior / Demonslayer Legend	Mutation Warrior 20 / Demonslayer Ranger 20	Fresh IE Legend MR3 -> 40	Strongest straightforward Legend martial extension
9.0	S+	Sable Company Marine	Sable Company Marine 1 / Paladin 13 / Sohei 1 / Mutation Warrior 5 / Trickster MR10	MR10	Flying Attack, mounted full attacks and terrain bypass
8.9	S	Sable Company Marine Legend	Sable Company Marine 1 / Paladin 20 / Sohei 1 / Mutation Warrior 18	Fresh IE Legend MR3 -> 40	Excellent mounted front line; Flying Attack can be patch-sensitive

Score	Tier	Final system	IE final form	Legend status	Why it ranks here
8.9	S	Ghost Rider	Ghost Rider 1 / Sacred Huntsmaster 8 / Vivisectionist 8 / Sohei 2 / Demonslayer 1 / Trickster MR10	MR10	Etheric Tether, mount safety, pet support and sneak-attack charges
8.8	S	Weretouched	Shifter (Weretouched) 17 / Stigmatized Witch 1 / Fighter 1 / Demonslayer 1 / Trickster MR10	MR10	Strong natural attacks, aspects and pounce without requiring a Demon route
8.7	S	Geomancer Legend	Stigmatized Witch 20 / Geomancer Sorcerer 1 / Loremaster 19	Fresh IE Legend MR3 -> 40	The fire-ray core survives Legend, but loses later path casting tools
8.6	S	Ghost Rider Legend	Ghost Rider 1 / Sacred Huntsman 8 / Vivisectionist 12 / Sohei 6 / Demonslayer 1 / Mutation Warrior 12	Fresh IE Legend MR3 -> 40	Complete mounted hybrid with strong ordinary-class scaling
8.4	A+	Weretouched Legend	Shifter (Weretouched) 20 / Stigmatized Witch 1 / Fighter 18 / Demonslayer 1	Fresh IE Legend MR3 -> 40	Strong natural-attack bruiser; no Demon/Kalavakus loop
-	-	Swarm-that-Walks candidate	Kinetic Sharpshooter 20 / Swarm-that-Walks MR8+	IE MR8 research pending	Not scored until the complete IE MR8 route is written
-	-	Gold Dragon candidate	Sword Saint 20 / Gold Dragon MR8+	IE MR8 research pending	Not scored until the complete IE MR8 route is written

The MR10 path-only systems-Angel Oracle, Lich caster and Trickster Sword Saint-have no fresh IE Legend version. The Legend rows are complete 40-level builds; they are not level-20 Mutation Warrior placeholders.

Recommendation by playstyle

Priority	Final system	Best use
1	Kinetic Sharpshooter 20 / Mutation Warrior 20	Best fresh IE Legend ranged damage
2	Inciter Skald 20 / Mutation Warrior 20	Best Legend party engine for a melee-heavy team
3	Angel Oracle MR10	Best divine caster and all-purpose support/damage
4	Lich caster MR10	Best offensive caster and boss debuff package
5	Trickster Sword Saint MR10	Best martial critical and Dimension Strike package
6	Brown-Fur Transmuter / Azata MR10	Best party-wide transformation support
7	Mutation Warrior / Demonslayer / Trickster MR10	Best straightforward martial finisher
8	Sable Company Marine Legend	Best mounted Legend front line

IE MR8 future candidates

These are included in the IE scope but are not yet final build entries: **Kinetic Sharpshooter 20 / Swarm-that-Walks MR8+** and **Sword Saint 20 / Gold Dragon MR8+**. They must be researched as IE MR8-capable mythic-route builds; neither is a fresh IE MR10/Legend entry or a main-campaign path-to-Legend conversion.

IE party shells

For the concrete six-person rosters, class levels and role-by-role abilities for the five main end states, see [IE Party Configurations](#). The short shells below remain as a quick reference; the linked file is the authoritative party matrix.

IE Mythic entry: level 20 / MR10 party:

1. Main character: Seeker Oracle 16 / Scaled Fist Monk 1 / Paladin 2 / Hellknight 1 / Angel, Stigmatized Witch 10 / Loremaster 9 / Crossblooded Sorcerer 1 / Lich, Sword Saint 20 / Trickster or KSS 20 / Trickster.
2. Inciter Skald 20 as a mercenary; use Mythic Companion unless the Inciter is the commander.
3. Brown-Fur Transmuter 20 as a mercenary; use Mythic Companion unless the BFT is the commander.
4. Cleric/Oracle buffer for Guarded Hearth, communal defenses, Death Ward and condition removal.
5. Sable Company Marine 1 / Paladin 13 / Sohei 1 / Mutation Warrior 5 mounted shell or Mutation Warrior 20 / Trickster front line.
6. Ember, Nenio, Arueshalae or Wenduag for ranged pressure, hexes and control.

IE Legend MR3 -> level 40 party:

1. Kinetic Sharpshooter 20/Mutation Warrior 20 as the ranged finisher.
2. Inciter Skald 20/Mutation Warrior 20 as the party engine.
3. Brown-Fur Transmuter or Arcanist support; keep casters out of Inspired Rage before Hit a Nerve.
4. Sosiel or Daeran for divine defenses, healing and Guarded Hearth.
5. Sable Company Marine 1 / Paladin 20 / Sohei 1 / Mutation Warrior 18 mounted front line.
6. Ember, Nenio, Arueshalae or Wenduag for ranged pressure, hexes and control.

Do not stack competing rage songs. Use one Inciter, keep KSS at range, and let the remaining slots cover transmutation, divine defense and a second front line.

Operational playbooks

These sequences describe the normal combat loop. Exact names can vary with patches, mods and respec choices; the combat log takes priority when an interaction is known to be patch-sensitive.

Kinetic Sharpshooter

Before combat: cast Greater Magic Weapon, Haste, Heroic Invocation/Greater Heroism, True Seeing, communal defenses and the needed transmutations. Create **Kinetic Quiver** with 1 Burn and keep charges available. Prepare the Heavy Crossbow, Fire -> Fire -> Air element line and the intended infusion.

Opening turn: let the Inciter start Raging Song, then select the target. Use **Blue Flame + Rending Arrows** against a target without problematic spell resistance. Use **Pure-Flame** when SR is the problem. If the current patch accepts the interaction, combine Rending and Pure-Flame through Over-Infused Blasts. Against a line or clustered group, use unaltered Blue Flame + Chain Arrows.

Blue Flame is the energy/touch-AC line; physical Air blasts use normal AC. Rending is for stacking the AC penalty after a hit, while Honed is the DR answer.

Keep **Enveloping Winds** active against ranged pressure. Swap to **Honed Infusion** when damage reduction is the problem; do not spend a burn on it when the target has no relevant DR.

Boss sequence: cast Trick Fate immediately before the decisive shot, use The Bigger They Are when its attack bonus matters, then fire the single charged blast. **Metakinesis - Empowered** is the reliable sustained default. Test Quicken on an empty target after a patch: keep it only if the combat log shows two Charged Ammunition entries and the expected extra Quiver cost; otherwise use Empowered. Refresh Kinetic Quiver before charges run out. Never use Gather Power; KSS cannot use it.

Do not waste actions on: Exploding Arrows as the default single-target line, Rapid Shot/Manyslot as a way to create extra KSS blasts, or Deadly Earth/Kinetic Blade/Eruption, which KSS cannot use.

Inciter Skald

Before combat: cast Greater Heroism, Good Hope, Haste, Freedom of Movement, Echolocation and defensive images. Put the Inciter in a safe position with a Dagger of the Betrayer or another finesse weapon if available.

Opening turn: activate **Raging Song**. Use Accept Rage on melee and thrown-weapon allies; leave it off for casters when the song would restrict spellcasting. Turn on Lethal Stance and Beast Totem/Greater Beast Totem for the attackers. Use Come and Get Me only when the front line can survive the incoming attacks.

Before level 20, activate Lingering Performance and then end the song when you need to preserve the three-round effect without forcing casters to accept rage. At level 20, test Hit a Nerve before treating the song as caster-safe; the Inciter does not automatically gain the base Skald's separate Haste capstone.

First attack: make a qualifying weapon sneak attack to trigger **Dispelling Attack**. Then let the two melee characters flank and full-attack. Use Selective Confusion, Song of Discord or Overwhelming Presence after the song and positioning are established. Persuasion I-III is the combat-control line: demoralize, paralyze and finish failed-save enemies.

Sustained loop: keep the song active, make weapon attacks when a dispel is valuable, and spend later actions on selective control or emergency buffs. At level 20 test Hit a Nerve; allies should be able to cast without the song's normal AC penalty. If the platform still blocks casting, turn the song off for caster rounds.

Sable Company Marine

Before combat: mount the hippogriff, apply Divine Favor, Greater Magic Weapon, defensive paladin buffs and the needed shield/armor setup. Mark or Smite the priority enemy before the charge when action economy allows.

Opening turn: use the hippogriff's **Flying Attack** with the mounted pair. The rider attacks the chosen target as a full-round action; terrain bypass and the flat-footed target help create the first flank. Follow with Outflank/Seize the Moment attacks when allies threaten the target.

Sustained loop: maintain the mount, rotate Smite Evil/Mark of Justice on major targets, and use Lay on Hands or mercies only when they prevent a lost full-attack round. Treat the flying attack as a positioning tool, not as the only source of damage.

Ghost Rider / Riding Vivisectionist

Before combat: mount up, apply the Vivisectionist's mutagen and defensive extracts, then use Greater Magic Weapon, Haste, Legendary Proportions and concealment. Enable Etheric Tether between rider and ghost mount before initiative if possible.

Opening turn: activate **Etheric Tether** between the rider and ghost mount, then charge the isolated target with the mount and rider. Use the rider's sneak-attack/full-attack package while the mount blocks movement and protects the back line.

Sustained loop: keep Etheric Tether active between rider and mount, refresh mutagen/extract defenses between encounters, and use ranged attacks, dispels or support extracts only when a full attack is impossible.

Weretouched

Before combat: choose the aspect and natural-attack form, apply Greater Magic Fang, Barkskin, Haste, Legendary Proportions or other party transmutations, then position for a charge. Do not plan around Demon/Kalavakus tricks in fresh IE Legend.

Opening turn: charge or pounce the priority target and make the full natural-attack sequence. Use the Stigmatized Witch/Loremaster support spell or hex only when moving into melee would lose more damage than the control effect gains.

Sustained loop: remain in the chosen form, maintain flank/Outflank positioning and use defensive transformations before attacking again.

Geomancer

Before combat: apply Haste, True Seeing, Greater Invisibility or concealment, communal defenses and Spell Resistance as needed. Prepare the ray metamagic; Geomancy is a free-action toggle for the next spell, not a persistent precombat buff.

Opening turn: remove or reduce enemy defenses with Dispel Magic when necessary, then cast the strongest available fire ray (Scorching Ray or Hellfire Ray) at the priority target. Use Bolstered/Empowered/Maximized versions according to spell slots and metamagic.

Sustained loop: continue ray volleys against single targets; use selective area control when enemies cluster. Enable the desired Geomancy effect immediately before the next creature-targeting spell; that spell consumes the toggle and deals +1d8 damage to you, so verify the terrain effect in the icon/log before committing metamagic. Keep the caster out of melee and let the front line create flat-footed or flanked targets.

Angel Oracle

Before combat: use the merged spellbook for long-duration communal defenses, Freedom of Movement, Death Ward, True Seeing, Greater Angelic Aspect and other enduring buffs. Apply Sword of Heaven before the encounter.

Opening turn: against one boss, use the strongest Angel bolt/ray sequence after any required debuff; against a group, use Storm of Justice or the highest available Angel area spell. Use Quickened buffs only when they preserve the main casting action.

Sustained loop: alternate Angel damage with Heal, dispels and emergency defenses. Do not spend the first combat round on small heals when an Angel spell can remove the encounter's main threat.

Lich caster

Before combat: apply long-duration arcane defenses, Mind Blank/True Seeing, Greater Invisibility or concealment and the Lich defensive package. Keep a quickened defensive spell available.

Opening turn: use Corrupt Magic or another major debuff on the boss, then follow with Exsanguinate, Negative Eruption or the strongest save-based Lich spell that matches the encounter.

Sustained loop: maintain control on the most dangerous enemy, use negative-energy damage against groups and preserve Repurpose/defensive tools for encounters where a new undead ally or immunity matters.

Trickster Sword Saint

Before combat: enhance the weapon with Arcane Pool, cast long-duration defensive wizard spells and prepare Dimension Strike, Prescient Attack and Trick Fate.

Opening turn: activate Prescient Attack or Dimension Strike on the priority target, use Trick Fate for a decisive crit sequence, then full-attack. Perception II's Trickster critical feats are the payoff for the route.

Sustained loop: alternate Arcane Pool/Dimension Strike full attacks with Bladed Dash or defensive repositioning. Save spell slots for defensive layers and boss accuracy rather than low-DC control.

Brown-Fur Transmuter

Before combat: cast the party package in this order: Greater Magic Weapon -> Legendary Proportions or Transformation -> Haste -> Echolocation/True Seeing -> communal defenses and condition immunity. Use Share Transmutation on the characters who actually attack.

Opening turn: begin with a preselected buff or a quickened control spell only if the party was not fully prebuffered. The BFT's first job is to make KSS, Inciter and the front line hit; offensive casting is secondary.

Choose **Powerful Change** for the BFT's stronger personal transmutation or **Shared Transmutation** to convert a personal spell for an ally; do not try to apply both to the same cast.

Sustained loop: maintain dispels, emergency Greater Invisibility and targeted transformations. Do not overwrite a better size or Dexterity buff with a weaker late spell.

Mutation Warrior

Before combat: activate Mutagen, equip the weapon from your chosen weapon-training group and apply long-duration martial buffs. Set Outflank/Seize the Moment positioning before initiative.

Opening turn: charge or full-attack the target already marked by the Inciter/KSS control package. Use the bonus feats and weapon training to keep attacking instead of spending turns on small utility actions.

Sustained loop: maintain mutagen, use Combat Reflexes opportunity attacks and keep the selected weapon-training group active. Change the group only outside combat or through a planned respec/equipment plan.

How to use the scores

The unified IE table above is the ranking list for complete end states. The playbooks below explain how to run the recommended systems; their headings identify the build and no longer repeat the DLC archetype grade.

IE complete build - Inciter Skald

Source build: [InEffect's Instigator Skald Mercenary](#)

Evaluation

Inciter is the strongest party-support system in this guide. It keeps the Skald's party engine and adds more damage to the rage-song package. It is best as a level-20 hire in a melee-heavy party. For an IE Mythic-entry character, the strongest control and crit-support route is **Inciter 20 / Trickster**; Azata is a valid caster-heavy alternative when Favorable Magic and Zippy Magic matter more than Trickster's skill and critical tricks. For a fresh IE Legend main character, use the class core but do not assume Mythic Rank 4-10 support choices survive the Legend start.

The Inciter song shares sneak-attack dice, Lethal Stance and Beast Totem with allies. Inciter's Sneaky Tricks also makes selected rogue talents shareable. At level 14, the strongest party-support talent is **Advanced Rogue Talent: Dispelling Attack** with Dispel Focus and Greater Dispel Focus; at level 19 use **Petrifying Strike** or **Weakening Wound**. If the current

patch still shows the old dispel bug, use Petrifying Strike as the reliable fallback. The underlying class progression is documented in the [GameFAQs Skald guide](#) and the [Rogue advanced-talent rules](#).

Creation

Field	Recommendation
Race	Half-Elf (Kindred)
Alignment	Any
Deity	Any; the source does not specify one and Skald does not require a deity
Background	Pickpocket
Skills	Max Persuasion and Perception; keep Mobility high; put 1 rank in Use Magic Device and add Trickery or Stealth only if the party lacks it. Do not spend core ranks on Lore (Nature).
Role	Party support, enchantment control, rage-power support
Starting stats	Source mercenary spread: STR 7, DEX 14, CON 14, INT 12, WIS 7, CHA 21 -> 26. For a 25-point-buy IE main character use STR 7, DEX 14, CON 14, INT 12, WIS 10, CHA 22 -> 27; put every normal level-up point into CHA.
Hire timing	Level 20 is preferred by the source
Key gear	Call to Violence; White Dragon; Mindmaster Eyes; Ring of Chaotic Fascination; Bracers of Mind Break; Twisted Temptation
Endgame gear	Headband of Perfection +8; Mindmaster Eyes; Cloak of Reflections; Ring of Chaotic Fascination; Ring of Evasion; Bracers of Mind Break; Glass Amulet of Clarity; White Dragon; Wandering Conman; Twisted Temptation; Dagger of the Betrayer (optional if available from imported/main-campaign inventory; otherwise any +5 finesse stat-stick dagger or rapier); Assertion of Dominance; Persistent Rods

Class

Skald (Inciter) 20

Level-by-level feats and abilities

Level	Take
1	Lingering Performance; Spell Focus: Enchantment
2	Skald
3	Greater Spell Focus: Enchantment; Lethal Stance
4	Combat feat: Improved Initiative
5	Spell Penetration
6	Beast Totem (Lesser)
7	Greater Spell Penetration
8	Skald
9	Dispel Focus ; Canny Observer
10	Skald
11	Extra Rage Power: Beast Totem
12	Greater Beast Totem; Sneaky Tricks unlocks shareable rogue talents
13	Greater Dispel Focus
14	Skald Talent: Advanced Rogue Talent - Dispelling Attack
15	Extra Rage Power: Come and Get Me, or Ambuscading Spell
16	Skald
17	Extra Rage Power: Deadly Accuracy
18	Lethal Accuracy

Level	Take
19	Selective Spell ; Skald Talent: Advanced Rogue Talent - Petrifying Strike (Weakening Wound or Crippling Strike are alternatives)
20	Master Skald; Hit a Nerve capstone

Strongest Inciter talent overlay

The table above is the optimized level-20 route. The old source's level-19 Improved Elven Immunities is omitted because Kindred-Raised Half-Elf may not retain that prerequisite; use Selective Spell plus an advanced rogue talent instead.

Dispelling Attack is a targeted Dispel on every shared sneak attack, with caster level equal to the character level. Use a weapon sneak attack (the source's Dagger of the Betrayer, a rapier or a throwing weapon) to proc it; do not assume a spell ray will trigger the shared dispel on every patch. **Petrifying Strike** lowers enemy Dexterity and therefore AC; use **Weakening Wound** when removing DR is more valuable. If Dispelling Attack does not actually dispel on your current patch, use Petrifying Strike at level 14 and Weakening Wound at level 19. At Inciter 20, verify that **Hit a Nerve** lets an ally cast while the song is active and removes the song's AC penalty; if your platform still blocks casting, treat that as a patch bug and turn the song off for caster rounds.

Sample level-20 spellbook

Spell level	Spells
1	Vanish; Unbreakable Heart; Remove Fear; Grease; Cure Light Wounds; Expeditious Retreat
2	Mirror Image; Cacophonous Call; Cure Moderate Wounds; Glitterdust; Invisibility; Summon Monster II
3	Good Hope; Haste; Confusion; Crushing Despair; Mass Feather Step; Purging Finale
4	Freedom of Movement; Greater Invisibility; Echolocation; Dimension Door; Cure Critical Wounds; Summon Monster IV
5	Greater Heroism; Mass Cacophonous Call; Song of Discord; Mind Fog; Summon Monster V
6	Overwhelming Presence; Waves of Ecstasy; Brilliant Inspiration; Greater Song of Discord; Summon Monster VI

Recommended IE Mythic route: Inciter 20 / Trickster MR10

For an IE mythic-entry character at level 20/MR10, take Trickster if the goal is the strongest party control package. Keep the source's generic mythic feats and use the separate Trickster trick slots in this order:

Mythic rank	Generic choice	Trickster choice
1	Last Stand	-
2	Extra Mythic Ability: Abundant Casting	-
3	Improved Abundant Casting	Perception I
4	Extra Mythic Ability: Mythic Inspiration	Perception II; Knowledge (World) I
5	Enforced Vigor	Persuasion I
6	Mythic Spell Penetration	Persuasion II; Knowledge (Arcana) I
7	Favorite Metamagic: Selective	Persuasion III; Infuse Magic Device
8	Mythic Spell Focus: Enchantment	Knowledge (World) II
9	Inspirational Leader	Perception III or Lore (Religion) I
10	Extra Mythic Ability: Rupture Restraints	Greater Trick utility (Mobility or Knowledge)

Perception II supplies the critical line for the melee attackers, while Persuasion I-III is the Inciter's control finisher. If your party already has a stronger Persuasion controller, use the MR9-10 trick slots for Mobility or Lore (Religion) instead. Azata is the alternative for a caster-heavy team: take Favorable Magic, Zippy Magic, Life-Bonding Friendship and Incredible Might, then keep Spell Focus: Enchantment and Selective Spell as the core.

IE MR10 mythic sequence

1. Last Stand

2. Extra Mythic Ability: Abundant Casting
3. Improved Abundant Casting
4. Extra Mythic Ability: Mythic Inspiration
5. Enforced Vigor
6. Mythic Spell Penetration
7. Favorite Metamagic: Selective
8. Mythic Spell Focus: Enchantment
9. Inspirational Leader
10. Extra Mythic Ability: Rupture Restraints (or Mythic Improved Initiative)

IE Legend adaptation

At fresh IE Legend, retain only the first two Mythic Hero choices. Do not plan on Mythic Inspiration, Enforced Vigor, Mythic Spell Penetration, or Mythic Spell Focus from later ranks.

For a level-40 Legend extension, use:

Skald (Inciter) 20 / Mutation Warrior 20 - this is an adaptation, not the Neoseeker source. Keep the Skald spellbook and song as the core; use the extra Fighter levels for bonus feats, mutagen and weapon training. Recommended extra feat priorities are Outflank, Dazzling Display, Shatter Defenses, Improved Critical for the chosen weapon, Weapon Focus, Weapon Specialization, Combat Reflexes, Seize the Moment, Blind Fight and Toughness. Do not expect Trickster Persuasion or later Inciter mythic feats after taking fresh IE Legend.

Inciter party configuration

Use Inciter as the first-round party engine, not as a solo damage dealer:

1. **Inciter 20 (Trickster)**: activate Raging Song with Accept Rage on the melee attackers, Lethal Stance and Beast Totem. Open with Greater Heroism, Good Hope and Haste; use Selective Confusion, Song of Discord and Overwhelming Presence only after the party is in position.
2. **Kinetic Sharpshooter 20**: the ranged finisher. It benefits from the song's shared sneak dice and the Inciter's enemy AC/Will penalties while staying outside melee.
3. **Brown-Fur Transmuter or other Arcanist**: Greater Magic Weapon, Legendary Proportions or Transformation, Echolocation and emergency Displacement/Greater Invisibility.
4. **Cleric/Oracle buffer**: Guarded Hearth, communal True Seeing, Death Ward, Protection from Energy and Remove Fear; this slot keeps the song user from spending turns on defensive cleanup.
5. **Full-BAB frontliner**: Mutation Warrior, Demonslayer or Sohei with Outflank/Seize the Moment to turn shared sneak dice into reliable melee damage.
6. **Flexible control/heal slot**: a Divine Hound, Witch or Loremaster for Frightful Aspect, dispels, heal and condition removal. A concrete companion shell is **Seelah + Regill + Ulbrig + Arueshalae/Wenduag**; replace one slot with **Sosiel or Daeran** when you need a dedicated divine buffer.

Before a boss: apply party buffs, position the two melee attackers for flanks, turn on the song, then use Inciter's Dispel/Selective control while KSS and the frontliners spend their turns attacking. If the party is caster-heavy, replace the second frontliner with an Azata-compatible controller and use Favorable Magic; the Inciter core remains unchanged.

IE complete build - Kinetic Sharpshooter

Absolute strongest IE Mythic route: Kinetic Sharpshooter 20 / Trickster MR10, with a Heavy Crossbow. **Legend-only route**: Kinetic Sharpshooter 20 / Mutation Warrior 20, documented below as the 1-40 alternative.

The established Kinetic Sharpshooter source is [InEffect's Kinetic Archer Wenduag](#), which is Fighter 1 / Kinetic Sharpshooter 19 because Wenduag already has Fighter 1.

KSS Charged Ammunition uses the equipped ranged weapon's attack, enhancement/applicable weapon properties and critical profile; community testing reports that base weapon dice and STR/composite damage are ignored; see the [KSS comprehensive test thread](#). It delivers only one kinetic blast per turn. It cannot Gather Power or use Deadly Earth. These rules are documented in the [GameFAQs Kineticist guide](#) and the [LUDO KSS guide](#).

Fresh IE has two mutually exclusive starting structures. The mythic entry is class level 20/MR10; the Legend entry is level 40/MR3 and does not continue through MR4-10. See the [IE postlude](#), [Legend mechanics](#) and the [IE path discussion](#).

Creation

Field	Choice
Race	Human
Background	Pickpocket: +2 initiative and Stealth/Trickery as class skills; see background data
Alignment	Chaotic Neutral; Kinetic Sharpshooter and Mutation Warrior have no alignment requirement. Change to Chaotic Evil or Neutral Evil only if you want a stricter Lamashtu roleplay.
Deity	Lamashtu (source-compatible and valid for CN/CE/NE); deity has no required KSS damage interaction.
Weapon	Heavy Crossbow. Weapon Focus and Improved Critical apply to the weapon used for Charged Ammunition; Kinetic Blast weapon focus does not.
Role	Single-target ranged damage, with optional line/AoE infusions.
Starting abilities	25-point buy before racial bonus: STR 12, DEX 16, CON 16, INT 14, WIS 12, CHA 7. Human +2 goes to DEX, so level-1 DEX is 18. Put every normal level-up point into DEX at character levels 4, 8, 12, 16, 20, 24, 28, 32, 36 and 40 for the maximum charged-blast attack bonus. Put Grand Mutagen's largest physical-stat bonus on DEX for charged-blast accuracy; use gear and secondary mutagen bonuses for CON. Move the last two level-up points to CON only if you prefer survivability over hit chance.
Skills	Max Perception, Stealth, Use Magic Device and Persuasion first. Your screenshot shows Persuasion only +4 while Mobility is already +32; move later ranks from Mobility into Persuasion if you intend to use Persuasion II/III. Use Trickery, Lore (Nature) or Knowledge (World) after those four priorities. Human + INT 14 supports this plan.
Spellbook	None. This build is not a caster. Use party buffs/scrolls: Greater Magic Weapon, Haste, Heroic Invocation, True Seeing, communal defenses and Transformation from a support caster.

Absolute strongest IE Mythic route: Kinetic Sharpshooter 20 / Trickster MR10

Use this route for a new IE character when your only criterion is the highest current KSS ceiling. It starts at level 20/MR10, so there is no level-1-to-40 campaign inside IE. KSS20 keeps the full blast progression, Infusion Specialization rank 6 and the live Critical Overdrive capstone; see the [KSS feature reference](#). Older tests reported an x4 overwrite, but your current screenshot shows **18-20 and x5** with Mythic Improved Critical Heavy Crossbow active. Keep that feat on your current patch and recheck the combat log after a major game update.

Primary creation and level plan

Use Human, Pickpocket, Lamashtu, Chaotic Neutral, Heavy Crossbow, the legal 25-point-buy spread above, and level-up DEX at 4/8/12/16/20. Max Perception, Stealth, Mobility and Use Magic Device; place spare ranks into Persuasion.

Character level	Class	Feat	KSS element, infusion or feature
1	KSS 1	Point-Blank Shot; Human bonus Precise Shot	Fire; Charged Ammunition
2	KSS 2	-	Fire's Fury
3	KSS 3	Weapon Focus: Heavy Crossbow	Kinetic Quiver; select Burning Infusion
4	KSS 4	-	Elemental Whispers: Hare
5	KSS 5	Spell Penetration	Empowered Metakinesis; select Fan of Flames; Infusion Specialization rank 1
6	KSS 6	-	Heat Adaptation
7	KSS 7	Deadly Aim	Expanded Element: Fire again; unlock Blue Flame
8	KSS 8	-	Infusion Specialization rank 2; Skill Focus: Perception
9	KSS 9	Greater Spell Penetration	Maximized Metakinesis; select Detonation; Torrent is the line alternative
10	KSS 10	-	Kineticist Bonus Feat - Fire -> Iron Will (the strongest combat choice for this utility slot)
11	KSS 11	Improved Critical: Heavy Crossbow	Rending Arrows; Wall is the form alternative; Infusion Specialization rank 3

Character level	Class	Feat	KSS element, infusion or feature
12	KSS 12	-	Kinetic Restoration
13	KSS 13	Improved Improved Critical: Heavy Crossbow after Trickster Perception II	Honed Infusion; it ignores DR
14	KSS 14	-	Infusion Specialization rank 4; Skill Focus -> Persuasion
15	KSS 15	Improved Improved Improved Critical: Heavy Crossbow	Expanded Element: Air -> Air Blast ; keep Electric Blast as the Touch-AC alternative only
16	KSS 16	-	Expanded Defense: Air (grants Enveloping Winds)
17	KSS 17	Improved Precise Shot	Pure-Flame for Blue Flame; combine with Rending only when Over-Infused Blasts works; Infusion Specialization rank 5
18	KSS 18	-	Aerial Evasion, which requires Enveloping Winds
19	KSS 19	Improved Initiative or Blind-Fight	Chain Arrows; Metakinetic Master - Empowered (default) . Use Quicken only if your combat log proves it creates a second KSS blast.
20	KSS 20	-	Celerity; Critical Overdrive ; Infusion Specialization rank 6

Level-10 exact choice: select Kineticist Bonus Feat - Fire, then select Iron Will. Do not select Skill Focus - Lore (Nature) for this damage build. Skilled Kineticist is a utility alternative: it automatically buffs the skills added by your primary element, including Fire's Lore (Nature), but it does not increase blast attack, damage, crit range or infusion power.

Level-14 exact choice: open Skill Focus and select **Skill Focus - Persuasion**. This supports the normal Trickster Persuasion I/II route and is the strongest general choice for this build. It is a combat-control investment, not a blast-damage bonus: Persuasion I demoralizes enemies as combat begins, and Persuasion II can paralyze demoralized enemies that fail their Will saves. If your screen still shows Persuasion at 0 ranks, move the 14 Mobility ranks into Persuasion before completing the level-up. Skill Focus - Stealth is a defensive/stealth fallback, mainly for the fresh Legend variant that does not continue the normal Trickster trick chain.

Level-15 exact choice: select Expanded Element - Air, then select **Air Blast**. Air Blast is physical bludgeoning damage with the Kineticist's higher physical-blast damage profile and does not require an SR check. Electric Blast targets Touch AC but is an energy blast that must overcome SR and is frequently resisted or immune in IE. Use Blue Flame for the primary energy-blast line; Air Blast is the physical backup and works with Honed/Rending options.

If Perception II is not visible when you respec, leave the two Trickster critical-feat slots open and select them after unlocking the trick. The final Trickster multiplier feat is deliberately omitted from the primary KSS20 route because current tests report Critical Overdrive hard-setting the blast multiplier at x4; use it only if your own log proves that it stacks.

Primary mythic and spell plan

First Ascension: exact click order for KSS

The First Ascension screen has two different choices that appear next to each other:

1. In the **Mythic Hero path-linked slot**, keep **Bit of Fun**. This is the Trickster-linked choice and is the correct selection for the KSS20/Trickster route. It creates three illusory copies; it is defensive utility, not blast damage.
2. In the separate empty **Mythic Ability** slot (the plus-sign slot), select **Last Stand**. This is the generic Mythic Ability for MR1 and is the choice used by this build for IE boss survival.
3. Leave **Bypass Epic Damage Reduction** unchanged; it is the fixed rank-1 benefit shown on the progression panel.
4. At MR2, the panel is a **Mythic Feat** slot. Select **Extra Mythic Ability**, then select **Ascendant Element: Fire**. Do not look for Ascendant Element directly in the MR2 Mythic Feat list.

Bit of Fun does not itself finalize the later path selection. When the IE route presents the path choice, select **Trickster**, then take Perception I and Perception II as specified below.

- MR1: **Last Stand**; keep **Bit of Fun** in the Trickster-linked slot.
- MR2: **Extra Mythic Ability: Ascendant Element: Fire**. MR2 is a Mythic Feat slot, so Ascendant Element must be taken through Extra Mythic Ability.

- MR3: **Over-Infused Blasts**; choose Trickster and take Mythic Trick **Perception I**.
- MR4: **Weapon Focus (Mythic) - Heavy Crossbow**; take Improved Mythic Trick **Perception II** and Mythic Trick **Knowledge (World) I**. Your screenshot has this legal combination.
- MR5: **Rupture Restraints**; take Mythic Trick **Persuasion I**.
- MR6: **Spell Penetration (Mythic)**; take Improved Mythic Trick **Persuasion II** and Mythic Trick **Stealth I**.
- MR7: **Ranging Shots**; take Greater Mythic Trick **Persuasion III** and Mythic Trick **Infuse Magic Device**.
- MR8: **Deadly Aim (Mythic)**; take Improved Mythic Trick **Knowledge (World) II** and Mythic Trick **Lore (Religion) I**.
- MR9: **The Bigger They Are**; take Improved Mythic Trick **Reuse Magic Device** and Mythic Trick **Mobility I**. If you can respec, putting The Bigger They Are at MR7 and Ranging Shots at MR9 gives the earlier attack bonus; your current order is legal.
- MR10: **Improved Critical (Mythic) - Heavy Crossbow**; take Greater Mythic Trick **Knowledge (World) III** and Mythic Trick **Knowledge (Arcana) I**. Your screenshot's x5 threat profile confirms that this feat is active on your current patch.
- There is no hard feat/ability conflict in the screenshot. The only practical conflict is investment: Persuasion II/III is weak at Persuasion +4 and CHA 7. Move ranks out of Mobility, add Eagle's Splendor/CHA gear, and keep the tricks only if you want their control effect.
- **Kinetic Overcharge** remains a bad KSS pick: its prerequisite and effect use Gather Power, which KSS replaces with Kinetic Quiver.
- Use **Trick Fate** before an IE boss. The [Trickster guide](#) documents Perception II, the critical feats and Trick Fate.
- KSS has no class spellbook. Party casters or scrolls provide Greater Magic Weapon, Haste, Heroic Invocation/Greater Heroism, True Seeing, Death Ward, communal defenses and Transformation.

Trickster spell picks for KSS

The Trickster spellbook is utility for this build; it does not increase Charged Ammunition damage. Prefer no-save self-buffs and movement tools over low-DC offensive spells.

Mythic rank	Spell level	Exact priority picks
1	1	Expeditious Retreat, Reduce Person, Vanish . Grease is the spare control slot; Feather Step is the terrain alternative.
2	2	Blur, Mirror Image, Invisibility . Keep Cat's Grace only when no other caster supplies Dexterity.
3	3	Displacement, Invisibility, Almost Greater, Slow . Hallucinogenic Cloud is the lower-priority control alternative.
4	4	Greater Invisibility, Chameleon Stride, Greater, Phantasmal Killer . Replace the offensive pick with Mass Reduce Person if your DC is poor.
5	5	Microscopic Proportions, Phantasmal Web, Mind Fog . Dominate Person is a single-target alternative; Rain of Halberds is a damage filler.
6	6	Cat's Grace, Mass, Phantasmal Putrefaction, Umbral Strike . Use Eagle's Splendor, Mass only for a Persuasion-heavy setup.
7	7	Trick Fate, Mass Invisibility, Insanity . Greater Shadow Conjuration is the safe replacement when Insanity's save is unreliable.
8-10	extra slots	No new spell level is required. Add extra casts of Greater Invisibility, Displacement, Cat's Grace, Mass, Phantasmal Web/Putrefaction and Trick Fate .

Keep **Reduce Person** for the strict combat route: it can provide a size-based attack benefit and Dexterity if no stronger Dexterity enhancement or size-changing buff is already active. Use **Feather Step** instead only if you deliberately avoid size changes and value terrain mobility more than attack accuracy. These are Trickster utility spells; they do not increase Charged Ammunition damage.

Screenshot audit and optimization notes

Your attached level-20 sheet is internally legal: Heavy Crossbow focus, the full Perception critical chain, Spell Penetration (Mythic), Ranging Shots, The Bigger They Are, Deadly Aim (Mythic), Mythic Improved Critical and the three Trickster skill lines can coexist. The sheet also shows **18-20 / x5**, so the old x4 warning does not apply to this save. Keep Mythic Improved Critical Heavy Crossbow unless a future patch changes the combat log.

Your only real weakness is skill allocation. Persuasion is +4 while Mobility is +32, so Persuasion II/III will not reliably paralyze or demoralize high-Will enemies. Move later ranks from Mobility to Persuasion and use Eagle's Splendor or Charisma gear. If you do not want to respec skills, treat Persuasion as utility and leave the rest of the mythic sequence unchanged.

At KSS19, the screenshot shows Metakinesis - Quicken. For a one-blast-per-turn KSS, **Empowered** is the strongest default because it adds damage without depending on a second blast bug. Keep Quicken only if the combat log visibly records two KSS blasts in one round; otherwise retrain to Empowered.

Primary combat routine

- Boss without SR: Blue Flame + Rending Arrows.
- Boss with high SR: Blue Flame + Pure-Flame.
- If your patch accepts Over-Infused Blasts, combine Rending Arrows + Pure-Flame on Blue Flame for the strongest single-target line; confirm both Substance effects in the combat log.
- Line/cluster: unaltered Blue Flame + Chain Arrows.
- KSS normally delivers one Charged Ammunition blast per turn. **Metakinesis - Empowered** is the reliable sustained level-19 choice. Keep **Quicken** only when your own combat log shows that it creates a second KSS blast on the current patch; Rapid Shot and Manyshot do not add blasts.
- Create the Quiver with 1 Burn at KSS3 and refresh it when charges run out.
- Avoid Exploding Arrows as the default attack because current reports show inconsistent Quiver/Infusion Specialization discounts.
- KSS cannot use Gather Power, Deadly Earth, Kinetic Blade, Eruption, Blade Whirlwind, Extended Range or Fragmentation.

KSS party configuration

Run KSS as the ranged finisher in a six-person team:

1. **KSS 20 / Trickster:** Fire -> Fire -> Air, Blue Flame for SR-resistant targets, Rending/Pure-Flame only when the combat log confirms both substance infusions, and Trick Fate for the boss turn.
2. **Inciter 20 / Trickster:** Accept Rage on the melee attackers, Lethal Stance, Beast Totem and shared sneak dice. The Inciter supplies the party-wide damage multiplier and enemy AC/Will pressure.
3. **Brown-Fur Transmuter or Arcanist:** Greater Magic Weapon, Haste, Heroic Invocation, Legendary Proportions/Transformation, Echolocation and emergency Greater Invisibility.
4. **Cleric/Oracle buffer:** Guarded Hearth, communal True Seeing, Death Ward, Protection from Energy, Freedom of Movement and Remove Fear.
5. **Full-BAB melee striker:** Mutation Warrior, Demonslayer or Sohei with Outflank and Seize the Moment. Keep this character adjacent to the Inciter so the song's shared sneak dice and flanking trigger consistently.
6. **Control/heal flex:** Witch, Loremaster or Divine Hound for dispels, hexes, Frightful Aspect, Heal and condition removal.

Buff order is: communal defenses and Greater Magic Weapon, transmutations and Haste, Inciter song, then KSS Quiver and boss debuffs. KSS stays at range while the two melee characters create flanks; do not make the KSS spend turns chasing a target just to trigger Ranging Shots.

Compatibility variant: KSS19 / Fighter1

The established Wenduag source and some older combat-log tests use Fighter1/KSS19 to avoid the current KSS20 blast-multiplier cap. Use the same Fire -> Fire -> Air progression, take Fighter1 first with Point-Blank Shot, Precise Shot and Deadly Aim, and stop KSS at 19. This is a patch-sensitive compatibility variant; the current maximum route is KSS20 because its threat-range bonus and rank-6 infusion discount remain valuable.

Why Legend is a separate lower-ceiling option

Legend adds ability scores and ordinary class levels, but the KSS blast does not gain iterative attacks from extra BAB. Trickster adds the Perception critical line and Trick Fate, which directly multiply the one-blast-per-turn mechanic. Use the Legend table below only when you specifically want a level-40/MR3 character.

Legend Mythic setup for fresh IE Legend

Choose Legend immediately at the IE Mythic Rank 3 setup. Do not plan a later Rank 4-10 path. Use the two retained Mythic Hero choices as follows:

1. **Mythic Rank 1 - Last Stand** for survival against IE boss burst.
2. **Mythic Rank 2 - Extra Mythic Ability: Ascendant Element: Fire** so Fire and Blue Flame are not stopped by fire resistance or immunity.

Prioritize Ascendant Element: Fire at the fresh Legend start because Blue Flame must ignore IE fire resistance and immunity. Mythic Improved Critical: Heavy Crossbow is already legal at character level 40, but it is a later/optional trade-off because KSS20 Critical Overdrive can overwrite the multiplier on some patches. Do not build around normal-campaign choices such as Over-Infused Blasts, Mythic Spell Penetration or later path abilities; they are not available after a fresh IE Legend start.

Legend levels 1-40: Kinetic Sharpshooter 20 / Mutation Warrior 20

Fresh IE Legend is already character level 40 / Mythic Rank 3. This is a strict respect blueprint that places Mutation Warrior 1 first, then Kinetic Sharpshooter 1-20, then Mutation Warrior 2-20. That order gives the early full-BAB/bonus-feat benefit and makes Improved Critical legal at character level 11. It is a planning table, not a claim that a fresh IE Legend will literally play through forty campaign levels.

Use the legal 25-point-buy spread above. Put every level-up point into DEX at character levels 4, 8, 12, 16, 20, 24, 28, 32, 36 and 40 for maximum charged-blast accuracy. Put Grand Mutagen's largest physical-stat bonus on DEX for charged-blast accuracy; use gear and secondary mutagen bonuses for CON. Move the last two level-up points to CON only for a survivability trade-off.

Character level	Class level	Normal feat / bonus feat	Infusion, element or class feature
1	Mutation Warrior 1	Normal: Point-Blank Shot; Human bonus: Precise Shot; MW bonus: Deadly Aim	Heavy Crossbow; Fighter proficiencies and bonus feat
2	KSS 1	-	Fire; Charged Ammunition
3	KSS 2	Weapon Focus: Heavy Crossbow	Fire's Fury
4	KSS 3	-	Kinetic Quiver; select Burning Infusion
5	KSS 4	Spell Penetration	Elemental Whispers: Hare
6	KSS 5	-	Empowered Metakinesis; select Fan of Flames; Infusion Specialization rank 1
7	KSS 6	Greater Spell Penetration	Heat Adaptation
8	KSS 7	-	Expanded Element: Fire again; unlock Blue Flame
9	KSS 8	Improved Initiative	Infusion Specialization rank 2; Skill Focus: Perception
10	KSS 9	-	Maximized Metakinesis; select Detonation; Torrent is the line alternative
11	KSS 10	Improved Critical: Heavy Crossbow	Kineticist Bonus Feat - Fire -> Iron Will
12	KSS 11	-	Rending Arrows; Infusion Specialization rank 3
13	KSS 12	Blind-Fight	Kinetic Restoration
14	KSS 13	-	Honed Infusion; Quicken Metakinesis
15	KSS 14	Improved Precise Shot	Infusion Specialization rank 4; Skill Focus: Stealth
16	KSS 15	-	Expanded Element: Air
17	KSS 16	Critical Focus	Expanded Defense: Air (grants Enveloping Winds); Composite Specialization
18	KSS 17	-	Pure-Flame Infusion for Blue Flame; Infusion Specialization rank 5
19	KSS 18	Improved Blind-Fight	Aerial Evasion or another legal Air utility
20	KSS 19	-	Chain Arrows; Metakinetic Master

Character level	Class level	Normal feat / bonus feat	Infusion, element or class feature
21	KSS 20	Greater Blind-Fight if Perception 15; otherwise Toughness	Celerity; Critical Overdrive; Infusion Specialization rank 6
22	MW 2	Bonus: Combat Reflexes	-
23	MW 3	Skill Focus: Use Magic Device	Mutagen; keep UMD ranks high
24	MW 4	Bonus: Weapon Specialization: Heavy Crossbow	-
25	MW 5	Great Fortitude	Weapon Training: Crossbows +1
26	MW 6	Bonus: Point-Blank Master: Heavy Crossbow	-
27	MW 7	Toughness	Discovery: Preserve Organs
28	MW 8	Bonus: Greater Weapon Focus: Heavy Crossbow	-
29	MW 9	Skill Focus: Persuasion	Weapon Training: Crossbows +2
30	MW 10	Bonus: Advanced Weapon Training: Trained Initiative, or another legal combat feat	-
31	MW 11	Improved Iron Will	Discovery: Preserve Organs again if offered
32	MW 12	Bonus: Greater Weapon Specialization: Heavy Crossbow	-
33	MW 13	Skill Focus: Mobility	Weapon Training: Crossbows +3
34	MW 14	Bonus: Shake It Off if the party uses teamwork feats; otherwise a legal defensive combat feat	-
35	MW 15	Lightning Reflexes	Discovery: Greater Mutagen
36	MW 16	Bonus: Advanced Weapon Training: Fighter's Reflexes or Fighter's Tactics	-
37	MW 17	Improved Lightning Reflexes or the best remaining defense	Weapon Training: Crossbows +4
38	MW 18	Bonus: Seize the Moment if using an attack-of-opportunity team; otherwise a legal combat feat	-
39	MW 19	Dodge	Discovery: Grand Mutagen
40	MW 20	Bonus: Snap Shot or another legal combat feat	Weapon Mastery: Heavy Crossbow; it automatically confirms critical hits and improves the weapon multiplier

How to attack

- **Single target with SR:** Blue Flame + Pure-Flame (one Substance infusion). Ascendant Element: Fire handles resistance/immunity; Pure-Flame handles Spell Resistance.
- **Single target without SR:** Blue Flame + Rending Arrows (one Substance infusion). Rending stacks an AC penalty up to -10. Rending and Pure-Flame cannot be combined without Over-Infused Blasts, which is unavailable in a fresh Legend start.
- **Line or cluster:** Use Detonation/Torrent. Chain Arrows is an unaltered-blast toggle and cannot be combined with Rending or Pure-Flame.
- **Burst turn:** Use Quicken for a second blast only if the current combat log proves two Charged Ammunition entries and the expected extra Quiver cost; otherwise use Empowered/Maximized for the single blast. Rapid Shot and Manyshot do not create extra KSS blasts.
- Read the combat log before assuming Weapon Specialization, Deadly Aim, elemental weapon procs or normal-arrow-only gear bonuses affect a charged blast.

Optional demon-heavy split

If your specific IE party is fighting almost exclusively demons and you value the immediate +2 attack/+2 damage more than KSS20's rank-6 infusion discount, use **Kinetic Sharpshooter 19 / Mutation Warrior 20 / Demonslayer Ranger 1**. The [IE Ranger guide](#) states that Demonslayer grants +2 attack and damage against all three demon categories at Ranger 1 and calls the one-level dip excellent. This is a demon-target alternative, not the primary all-enemy IE build: KSS20 has Infusion Specialization rank 6, a final Wild Talent and lower sustained infusion costs, while IE also contains inevitables, constructs and other non-demon enemies.

Current implementation cautions

- **Exploding Arrows:** the [Steam test report](#) found that Exploding Arrows do not receive the normal Infusion Specialization/quiver discount. Avoid them for single-target damage; use Torrent, Wall, Rending or Chain as appropriate.
- **Chain Arrows:** the KSS guide documents that Chain is an unaltered-blast form and cannot be combined with Rending/Pure-Flame. It is a line/cluster tool, not the default single-target shot.
- **Deadly Earth:** KSS cannot select it. Do not copy a normal Earth/Fire Kineticist control build into this archetype.
- **Weapon feats:** Weapon Focus and Improved Critical must name the equipped Heavy Crossbow, not Kinetic Blast; the GameFAQs KSS section documents this distinction. Weapon Specialization/Greater Weapon Specialization are included for the Fighter extension; if a current patch combat log shows that a specialization bonus is not propagated to Charged Ammunition, replace that one feat with Improved Initiative, Toughness or Iron Will.
- **Mythic timing:** fresh IE Legend is a level-40/MR3 setup. If you already started an IE character on another path and passed the available Legend selection, do not assume the main-campaign MR8 transition remains available; respec or restart according to the mode's path screen.

IE complete build - Sable Company Marine

Source build: [InEffect's Paladin Mercenary, DLC6](#) Dedicated DLC evaluation: [A Dance of Masks New Content Evaluation](#)

Evaluation

Sable Company Marine is one of the best one-level dips in the entire game: it supplies a hippogriff with Flying Attack, a full-round mounted attack that bypasses terrain and leaves the target flat-footed. The full source build wraps that dip in a Lawful Good Paladin shell. The mount is the reason this system scores highly in the unified IE table. Treat Flying Attack as a quality-of-life feature that can be janky in some encounters.

Creation

Field	Recommendation
Race	Half-Elf (Kindred)
Alignment	Lawful Good
Deity	Sarenrae - adaptation; the source is silent, but its Dawnflower Kiss and War-Kilt of Sarenrae items make this thematic
Background	Pickpocket
Skills	Athletics 20; Use Magic Device 1; Perception spare
Role	Mounted Paladin tank/damage dealer
Stats	STR 16, DEX 7, CON 14, INT 7, WIS 10, CHA 21 -> 26
Core items	Fencer's Gift or Gloves of Dueling; Righteous Crusader's Ring; Half of the Pair; Boots of Stampede; Dawnflower Kiss (Good); Tower Shield; Robe of Order; Shy Lily's Helmet; Life Infuser; Bracers of Animal Fury

Class

Paladin 13 / Sohei Monk 1 / Sable Company Marine Ranger 1 / Mutation Warrior Fighter 5

Rider progression

Level	Take
1	Paladin: Improved Initiative
2	Ranger (Sable Company Marine)
3	Sohei: Boon Companion; Mounted Shield
4	Paladin
5	Paladin: Shield Focus
6	Paladin
7	Paladin: Outflank; Animal
8	Paladin
9	Paladin: Improved Critical: Scimitar
10	Paladin
11	Paladin: Weapon Focus: Scimitar
12	Paladin
13	Paladin: Medium Armor Focus
14	Fighter: Lunge
15	Fighter: Dazzling Display; Shatter Defenses
16	Fighter
17	Fighter: Toughness; Weapon Specialization: Scimitar
18	Fighter: Heavy Blades
19	Paladin: Back to Back
20	Paladin

Mercies: Fatigue; Sickened; Exhaustion; Blindness.

Paladin spell priority

Spell level	Spells
1	Grace; Divine Favor; Lesser Restoration
2	Aura of Courage; Bestow Grace; Remove Paralysis
3	Archon's Aura; Delay Poison
4	Eaglesoul; Inspiring Recovery

IE MR10 mythic reference sequence

1. Master Shapeshifter
2. Improved Critical (Mythic): Scimitar
3. Mythical Beast
4. Extra Mythic Ability: Abundant Smite
5. Last Stand
6. Mythic Armor Focus (Medium Armor) - Assault
7. Inspirational Leader, or Ever Ready
8. Weapon Specialization (Mythic): Scimitar
9. Mythic Charge
10. Improved Initiative, or Extra Mythic Ability: Rupture Restraints

Hippogriff

- Pet type: Hippogriff, Bulwark.
- Pet skills: Mobility and Perception.
- Pet items: Half of the Pair; Bracers of Armor; Ultimate Predator; Helmet of Comradery; War-Kilt of Sarenrae; Misty Cover; or Clear Vision, Lizard Tail and a Cloak of Resistance.
- Pet feats: Dodge (1); Diehard (3); +1 INT or +1 DEX (4); Improved Unarmed Combat (5); Crane Style (7); +1 DEX (8); Outflank (9); Crane Wing (11); +1 DEX (12); Crane Riposte (13); Combat Reflexes (15); +1 DEX (16); Toughness (17); Back to Back (19).

IE Legend adaptation

Keep the mount and Paladin core; do not rely on later Mythic Charge or Mythical Beast ranks.

For a level-40 Legend extension, use:

Paladin 20 / Sohei 1 / Sable Company Marine 1 / Mutation Warrior 18 - adaptation. This keeps a level-20 Paladin, the Sable hippogriff and a large Fighter feat/mutagen package. The source's pet plan remains the same; use the rider's extra feats for mounted combat, critical, weapon specialization, Combat Reflexes, Seize the Moment and defensive feats.

IE complete build - Ghost Rider / Riding Vivisectionist

Source build: [InEffect's Riding Vivisectionist Mercenary](#) **Dedicated DLC evaluation:** [The Lord of Nothing New Content Evaluation](#)

Evaluation

The dedicated DLC review highlights Ghost Rider as a strong one-level dip for Etheric Tether and notes two viable directions: a one-level tether dip or a full paralysis-DC build. The source build below chooses the one-level dip and uses the rest of the levels for a mounted Vivisectionist/Sacred Huntsmaster chassis.

Creation

Field	Source
Race	Tiefling (Motherless)
Alignment	Lawful Good or Lawful Neutral
Deity	Erastil
Background	Pickpocket
Skills	Athletics; Perception; spare points as the party requires
Role	Mounted damage/support; shield infusions; pet safety
Stats	STR 19 -> 24, DEX 7, CON 14, INT 12, WIS 16, CHA 7
Recommended gear	Finnean; Mutilated Angel; Gloves of Deathdealer; Amulet of Mighty Fists; Mask of Rapid Bites; Belt and Headband of Perfection +6

Class

Ghost Rider Cavalier 1 / Sacred Huntsmaster Inquisitor 8 / Vivisectionist Alchemist 8 / Sohei Monk 2 / Demonslayer Ranger 1

Level-by-level feats and abilities

Level	Take
1	Cavalier (Ghost Rider): Power Attack
2	Alchemist
3	Alchemist: Focused Strike; Infusion

Level	Take
4	Monk (Sohei): Improved Initiative
5	Alchemist: Boon Companion
6	Alchemist: Outflank
7	Alchemist: Accomplished Sneak Attacker
8	Alchemist: Weapon Focus: Glaive
9	Alchemist: Lunge
10	Inquisitor: Community domain
11	Inquisitor: Improved Critical: Glaive
12	Inquisitor: Back to Back
13	Inquisitor: Extend Spell
14	Inquisitor
15	Inquisitor: Spell Focus: Abjuration; Precise Strike (requires temporary Web Strider and a +4 DEX item)
16	Inquisitor: Dazzling Display
17	Inquisitor: Spell Specialization: Shield (quality-of-life choice)
18	Alchemist: Shatter Defenses
19	Ranger: Armor Focus: Light
20	Monk: Combat Reflexes

Inquisitor spellbook

Spell level	Spells
1	Divine Favor; Magic Weapon; Bless; Remove Fear; True Strike
2	Remove Paralysis; Lesser Restoration; Cure Moderate Wounds
3	Cure Serious Wounds; Delay Poison

Alchemist spellbook

Spell level	Spells
1	Shield
2	Barkskin; Animal Aspect; False Life
3	Delay Poison

IE MR10 mythic reference sequence

1. Last Stand
2. Power Attack
3. Impossible Domain: Animal
4. Improved Critical (Mythic)
5. Master Shapeshifter
6. Extra Mythic Ability: Mythical Beast
7. Abundant Casting
8. Light Armor Focus - Assault
9. Abundant Bane

10. Any; the source suggests Rupture Restraints or Inspirational Leader

Horse

- Pet type: Horse.
- Pet skills: Mobility and Perception.
- Pet feats: Bulwark and Dodge (1); Diehard (3); +1 INT (4); Improved Unarmed Combat (5); Crane Style (7); +1 DEX (8); Blind Fight (9); Crane Wing (11); +1 DEX (12); Crane Riposte (13); Iron Will (15); +1 DEX (16); Improved Iron Will (17); +1 DEX (18); Toughness (19); +1 DEX (20).

IE Legend adaptation

The source build remains useful because its core is class-based: Etheric Tether, Vivisectionist infusions, Sacred Huntsmaster domain access, Sohei and a Demon-focused dip. Do not rely on the source's Mythic Rank 4-10 list.

For a level-40 Legend extension, use:

Ghost Rider 1 / Sacred Huntsmaster 8 / Vivisectionist 12 / Sohei 6 / Demonslayer 1 / Mutation Warrior 12 - adaptation. This keeps the original 20-level core, increases Vivisectionist and Sohei, and uses Mutation Warrior for the remaining levels.

IE complete build - Weretouched

Source build: [InEffect's Demonic Shifter](#) **Dedicated DLC evaluation:** [The Lord of Nothing New Content Evaluation](#)

Evaluation

Weretouched is a strong natural-attack tank/damage dealer. The source specifically warns that much shapeshifting gear does not work correctly with Weretouched and that Use Magic Device is needed for Seamantle scrolls. The source's Demon aspects are powerful, but a fresh IE Legend cannot select Demon and then transition later; this document therefore removes the Demon-only loop from the recommendation.

Creation

Field	Recommendation
Race	Human
Alignment	Any
Deity	Lamashtu; the source says this is thematic and mechanically replaceable
Background	Martial Disciple
Skills	Mobility 3; Athletics 20; Perception 20; Use Magic Device 20; Stealth spare
Role	Natural-attack tank/damage dealer
Stats	STR 19 -> 24, DEX 14, CON 12, INT 7, WIS 16, CHA 9
Core items	Mask of Nothing; Broken Trickster; Amulet of Mighty Fists; Icy Protector; Ring of Imminent Demise; Apprentice Robe; Embroidered Gloves; Bracers of Balance; Belt +8
Scroll requirement	A +2 CHA item is needed to cast Seamantle scrolls
Gear bug note	Bestial Rags would be preferable if its Weretouched interaction is ever fixed

Class

Shifter (Weretouched) 17 / Stigmatized Witch 1 / Fighter 1 / Demonslayer Ranger 1

The Fighter level is explicitly swappable in the source.

Level-by-level feats and abilities

Level	Take
1	Shifter: Extended Aspects; Dodge

Level	Take
2	Shifter
3	Shifter: Crane Style
4	Shifter
5	Stigmatized Witch: Lizard familiar; Plagued curse; Iceplant; Outflank
6	Shifter
7	Shifter: Shifter Multiattack
8	Shifter
9	Improved Critical: Claw
10	Shifter
11	Weapon Focus: Claw
12	Shifter
13	Dazzling Display
14	Shifter
15	Shatter Defenses
16	Shifter
17	Power Attack
18	Shifter
19	Demonlayer Ranger: Focused Strike
20	Fighter: Improved Initiative

Spell priority

The source's Witch spell entry is:

Source spell level	Spell
1	Mage Armor

The source also lists Demon-only spells that are **not available** to a fresh IE Legend who chooses Legend at MR3:

- Enlarge Person
- Mirror Image
- Haste
- Telekinetic Strike
- Profane Hymn
- Abyssal Skin
- Telekinetic Burst

For the IE Legend adaptation, obtain the same defensive functions from party casters or scrolls:

- Mage Armor
- Mirror Image
- Haste
- Seamantle
- Legendary Proportions or Frightful Aspect from a support caster
- True Seeing and communal defenses as needed

IE MR10 mythic reference sequence

1. Danse Macabre; Last Stand
2. Extra Mythic Ability: Master Shapeshifter
3. Archmage Armor
4. Improved Critical (Mythic)
5. Mythic Charge
6. Dodge (Mythic)
7. Rupture Restraints
8. Power Attack
9. Inspirational Leader or Ever Ready
10. Flawless Attacks

IE Legend adaptation

Use only the fresh IE Legend Mythic ranks that the mode provides. Do not use Demon aspects, Kalavakus trip loops or Demon spell slots.

For a level-40 Legend extension, use:

Shifter (Weretouched) 20 / Stigmatized Witch 1 / Fighter 18 / Demonslayer Ranger 1 - adaptation. The extra Shifter levels finish the class, while Fighter supplies the additional martial feats and Demonslayer remains a useful demon-focused dip.

IE complete build - Geomancer

Source build: [InEffect's Burning Ember, DLC5](#)

Evaluation

Geomancer is the strongest caster in the recommended IE set for a direct fire-ray plan. The source describes a ray Witch with AoE support, approximately 600 damage on a Hellfire Ray critical, and roughly 30 extra damage per round from Geomancy in AoE situations. The build remains usable in IE Legend because its core damage comes from spell selection, metamagic, gear and class features rather than a merged Mythic spellbook.

The source page is written for Ember and therefore does not repeat race, deity, alignment or background. For a new IE mercenary, use the completion fields below.

Creation

Field	Ember source	New mercenary completion
Race	Companion-fixed	Human or any race with useful Charisma/Dexterity
Alignment	Companion-fixed	Any
Deity	Companion-fixed/irrelevant	Any
Background	Companion-fixed/implicit	Pickpocket
Skills	Knowledge: World; Stealth; Use Magic Device spare	Same
Role	Fire ray damage, AoE, hex support	
Stats	STR 9, DEX 16, CON 12, INT 12, WIS 13, CHA 17 -> 22	Same

Field	Ember source	New mercenary completion
Mandatory gear	Legacy of the Last Azlanti; Goggles of Piercing Gaze; Deadly Rays; Cloak of Carnage; Call of the Fiery Things or Robes of Fire; Pristine Mind; Ring of Pyromania; Steady Finger; Red Salamander; Gloves of Arcane Eradication; Scorching Bracers; Boots of Arcane Persistence; Ashmaker; Triceratops Statuette; Greater Maximize Rods; Quicken Rods	

Class

Stigmatized Witch 10 / Geomancer Sorcerer 1 / Loremaster 9

Level-by-level feats, secrets and spells

Level	Take
1-3	Stigmatized Witch opening levels; reserve the first Witch feat choices for the source's level-4 table
4	Protective Luck
5	Spell Penetration
6	Cackle
7	Geomancer Sorcerer: Bolster Spell; Greater Spell Penetration; Gold bloodline
8	Witch
9	Skill Focus: World; Fortune
10	Loremaster: Druid spell - Barkskin
11	Loremaster: Spell Focus: Evocation
12	Loremaster: Rogue Secret - Combat Trick -> Greater Weapon Focus: Ray
13	Weapon Focus: Ray
14	Improved Critical: Ray
15	Greater Spell Focus: Evocation
16	Loremaster: Cleric spell - Divine Power
17	Empower Spell
18	Witch
19	Elemental Focus: Fire; Beast's Gift
20	Loremaster: Cleric spell - Mass Heal

Spell priority

Spells marked with an asterisk are supplied by the curse or gear in the source and do not need to be learned normally.

Spell level	Spells
1	Unbreakable Heart; Cure Light Wounds; Ear-Piercing Scream; Mage Armor; Reduce Person
2	Scorching Ray; <i>Burning Arc</i> ; Glitterdust; Cure Moderate Wounds; Bone Fists
3	Stinking Cloud; Heroism; Cure Serious Wounds; Fireball*
4	Death Ward; Dimension Door; Cure Critical Wounds; Greater False Life
5	Feeblemind
6	Greater Heroism; Raise Dead; Greater Dispel Magic
7	Heal; Legendary Proportions; Hellfire Ray*; True Seeing (communal)
8	Mind Blank; Summon Monster VIII

Spell level	Spells
9	Foresight; Heroic Invocation

Metamagic priorities

- Bolster: Scorching Ray; Burning Arc; Fireball; Controlled Fireball; Fire Snake; Hellfire Ray (level 6 and level 7 versions); Firestorm.
- Bolster + Empower: Scorching Ray; Fireball; Hellfire Ray (level 6 version).

IE MR10 mythic reference sequence

1. Ascendant Element: Fire
2. Extra Mythic Ability: Abundant Casting
3. Improved Abundant Casting
4. Improved Critical (Mythic)
5. Last Stand
6. Mythic Spell Penetration
7. Greater Abundant Casting
8. Extra Mythic Ability: Favorite Metamagic: Bolstered
9. Master Shapeshifter
10. Mythic Spell Focus

The source uses Animal Aspect or a similar transformation effect to trigger Master Shapeshifter; provide that buff from a Brown-Fur Transmuter or Alchemist if you use this normal-campaign sequence.

IE Legend adaptation

Take Ascendant Element: Fire and the most useful casting/defensive options from the three IE Mythic ranks. Do not depend on the later Abundant Casting chain, Mythic Spell Penetration, Master Shapeshifter or Mythic Spell Focus entries from the source.

For a level-40 Legend extension, use:

Stigmatized Witch 20 / Geomancer Sorcerer 1 / Loremaster 19 - adaptation. The original ray core stays intact; the extra Loremaster levels provide secrets and utility after normal caster-level breakpoints. Use your extra non-mythic feats for metamagic, ray accuracy, Spell Penetration, Improved Critical (Ray), Initiative and defensive survival.

Final IE Legend build choices

If you want one build only:

1. **Kinetic Sharpshooter** for self-contained ranged damage.
2. **Inciter Skald** if the party is melee-heavy.
3. **Sable Marine + Paladin** for mounted frontline play.
4. **Geomancer** for fire-ray casting.
5. **Ghost Rider** for the mount/tether dip and mounted Vivisectionist.
6. **Weretouched** for natural attacks after removing Demon-only assumptions.

The central IE rule is the same for all six: select Legend at IE Mythic Rank 3 if that is the goal. For the IE Mythic entry, use the adapted MR10 sequence; for fresh IE Legend, every MR4-10 path feature is unavailable.
